## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the solid-state laser resonator and the internal resonator of claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: applicant recites an

internal resonator having a length, however has failed to define the structure of the resonator being that the internal resonator is essential to the claimed invention.

Regarding claims 7,12,14 and 19,

It is not clear within the claim language how the absorption band is detected or determined, no structure has been recited for the laser system to perform such a function.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Okazaki (PN 5,671,240).

Figure 7 illustrates a solid state laser having a laser (11), a lens (12) and a resonators comprised of coatings (53), (54) and (55) as described in the table of column 3. The solid-state resonator formed by coatings (53) and (54) includes a gain medium (50) and a ¼ wave plates (18), (19). The resonator formed by coatings (54) and (55) includes an etalon (17), crystal (51) for wavelength conversion and a calcite crystal (52) as described in columns 5 and 6. Column 5 lines 45-47 disclose the resonator as being 15 mm.
